

KANSAS PICNIC
 All who ever lived in Kansas are called to meet for a great picnic reunion, all day, Saturday, Jan. 28, not on Sunday the 29th, in Long Beach at the pier and auditorium.

Mr. and Mrs. R. R. Gerhart and family of 259th place who started for Catalina Sunday in Mrs. Gerhart's brother's launch, turned back because of the rough sea, and picnicked at Orange county park instead.

A NATIONAL BANK

150,000 Boys and Girls have School Savings Accounts with Bank of Italy

If 150,000 school children of this state have millions of dollars on deposit in the School Savings Department of the Bank of Italy—surely the average salaried person can save something!

Bank of Italy's youthful depositors are setting a worthy example to their elders.

Get your name on a Bank of Italy bank book today!

**Buick Beauty . . .
 Buick Luxury . . .
 Buick Performance**
for only \$1195

You can buy a Buick closed car at prices as low as \$1195, f. o. b. factory. You can buy it on the liberal G. M. A. C. plan—with a moderate down-payment which may be taken care of by your present car in trade.

These prices mean maximum value, and in Buick you get real beauty—real comfort—real performance. You get the unrivaled value resulting from Buick's unrivaled production in the quality field.

Come in—see Buick—compare it with other cars of similar price—then let the facts decide you to buy Buick.

SEDANS \$1195 to \$1995 . COUPES \$1195 to \$1850
 SPORT MODELS \$1195 to \$1525
 All prices f. o. b. Flint, Mich., government tax to be added.
 The G. M. A. C. financing plan, the most desirable, is available.

Focus of Interest on Buick at N. Y.

Flint, Mich.—Comment from the National Automobile Show at New York, filtering back to Flint, indicates that Buick's Rainbow Chassis ranked well up among the many show exhibits as a focus of public interest.

The Rainbow Chassis, prepared under the supervision of Kingston Forbes, Buick style engineer, represents months of work. It consists of a regular 1928 Buick chassis, exterior parts of which are so cut away as to reveal every moving part in actual operation.

The frame is finished in soft tan Duco, and the springs, radiator shell, and all other unlaqueered parts, including gears, in gleaming nickel. Small lamps of various colors are concealed inside the crankcase, head, transmission and rear axle housings, and torque tube, and between the channels of the frame, and these flash on and off and change hue as the chassis' driving apparatus turns, flooding the whole display with soft light of many tints.

The chassis is said to be the most elaborate attempt ever made to reveal the inner workings of a motor car. Not only the operation of the pistons, but that of valves, camshaft, push rods, crankcase and all the other interrelated mechanism is plainly visible, so that each individual part may be readily discerned.

"The Buick chassis is about as far from conventional design," said Mr. Forbes, "as the Rainbow Chassis from ordinary cutaway chassis hitherto seen. It is the product of almost a quarter-century of development, and progress—development which has produced the vibrationless six-cylinder valve-in-head engine, the double drop frame, the torque tube drive, the famous sealed feature which shuts out dust and moisture, cantilever springs, hydraulic shock absorbers and mechanical four-wheel brakes."

HOME-MADE CANDIES

This is the time of year to begin to assemble the choice candy recipes, and prepare for the winter campaign. A good supply of sweets and confections are always a satisfaction when entertaining.

Divinity Fudge—Take two cups of sugar, two-thirds of a cup of corn sirup, one-third cupful of water, boil without stirring until it forms a brittle ball in cold water. Pour the hot sirup over the well-beaten whites of two eggs, add one-half cupful of seedless raisins, one-half cupful of chopped walnuts and a teaspoonful of vanilla. Pour into a greased pan and when cool cut into squares.

Peanut Brittle—Shell one quart of peanuts, remove the brown skins and chop or roll until somewhat broken. Put a pound of sugar into a smooth enamel pan and stir over the heat until melted to a sirup. Add the nutmeats and pour into a well-buttered pan, adding a fourth of a teaspoonful of soda to the sirup before the nuts. Break into pieces when cold.

Raisin Fudge—Take one-half cupful of milk, 1 cupful each of white and brown sugar; one square of chocolate cut fine; cook until the mixture makes a soft ball when dropped in cold water. Remove from the fire, add one tablespoonful of butter and cool. Then add one-half cupful of raisins, one teaspoonful of vanilla and beat until the mixture is creamy. Pour into a buttered pan and mark in squares as soon as it is cool enough.

Molasses Chips—Put three cupfuls of sugar, one-fourth teaspoonful of cream of tartar and one cupful of water into a kettle. Stir until the boiling point is reached, brushing down the sides of the kettle to remove any grains. Covering the kettle for a short time will dissolve them. Add two-thirds of a cupful of molasses and cook until the candy is brittle. Remove from the fire, add one-third of a cupful of butter, a pinch of salt and a little vanilla. Pour into buttered pans to cool, then pull and cut into pieces.

Pretty Tough Going These Days

"When the frost is on the pumpkin and the corn is in the shock, I'll sure redeem my overcoat, and put the Ford in hock", sang a friend of ours after betting the bank-roll that the Pirates would show the Yankees how to play REAL baseball. We'd like to show you a sheet metal service that will mean complete satisfaction to you because of its thoroughness. Roofing, cornices, gutters and piping a specialty.

Build and Live in Torrance

A New England Colonial Type Home

By R. C. Hunter and Bro., Architects, New York

The simplicity of the exterior of this house gives it character. There is no elaboration of detail; good proportions, simple materials and well placed openings give a good effect.

The plan layout is simple and direct, a feature is the maid's room and bath and the garage on the first floor in a wing which balances the open living porch on the opposite end of the house. This arrangement makes the car directly accessible from the home and the hall which serves the maid's room also allows the maid's bath to be used as a lavatory for the family.

The space in the pitched roof over the living porch serves as large wardrobes for the bed rooms, a very practical and useful arrangement that overcomes the objection of small closets so prevalent in most houses.

A generous attic is provided where an additional room and bath may be finished off if desired.

A cellar extends under the entire house and provides space for laundry, heater, coal storage, etc.

The house measures fifty nine feet eight inches across the front including garage and living porch and should have a lot with a frontage of not less than seventy feet. It could be built on a smaller scale.

Complete working plans and specifications of this house may be obtained for a nominal sum from the Building Editor. Refer to House H-A-157.
